

Equipment Upgrade

Opcos and Towercos are optimizing the products that are deployed in their network. PACE offers viable and valuable proposition to optimize their costs for their investments made and also to enhance the life of the deployed products. Some solutions are aimed at opex reduction measures to reduce the costs towards energy. Following are the activities that PACE has proposed and undertaken as part of Equipment Upgrade:

- Capacity Enhancement of PIU/PMU
- Indoor to Outdoor conversion of PIU/PMU
- Retrofit activity of PIU & PMU
- LCU by pass
- LCU Fan Assembly
