

O&M Services for Solar Sites

PACE offers unparalleled experience and expertise as a leading OEM (Original Equipment Manufacturer) and Service Provider. Our O&M services for solar sites are customized to meet the requirements of the customer.

The portfolio of our O&M services for solar, cover all the stages from the design inception, survey, supply and implementation and overall Operations & Maintenance of the BTS Site.

Our services aim to optimize every procedure and component to give the customer a broad spectrum of profitability and commercial viability.

PACE undertakes Solar Solutions & O&M of Solar Sites under two models.

- Capex Model – Design, solution, survey, supply, implementation and handover to O&M after acceptance
- Opex Model - Design, solution, survey, supply, implementation and O&M services for a tenure of 7 years or above.

The objective of the Solar Solutions for the customer is

- To provide optimal Energy Solutions for different BTS Sites based on their load
- To minimize the DG Run Hrs
- Efficient utilization of Battery Bank and Solar Power

Our services cover real-time data capturing by 24 x 7 remote monitoring on key parameters viz. alarms, DG usage, Solar Harvest, etc. this helps customers' business needs.
