

## History

The year 2003 is of historical importance for Pace Power, as it witnessed the founding of a company that would provide ground-breaking Energy solutions for Telecom Industry in India and abroad. Mr. Venugopal has had varied experience in the creation and leadership of diverse telecom business services before he started Pace Power in 2003. Being the MD and founder of Pace Power Systems, he brings on board his expansive expertise and visionary experience to lead the company towards tremendous success across the globe. Pace Power, being a Product Supplier has grown into a major O&M Service provider for Telecom Operators, Tower Companies, Equipment Vendors (OEMs), TSP's, Solar Integrators, Banks, Petroleum companies, and Government Enterprises globally. With the support of a knowledgeable team of professionals and competent management, Pace has achieved the status of a leader in the Design, Manufacturing and Sale of a wide range of Products & Services in India and Africa. Pace Corporate has its headquarters in Bangalore, India. Currently our presence is all across India and in 15 countries of Africa. Pace is a privately owned company with has got ISO 9001 and ISO 14001 certification. With utmost priority towards quality and reliability of all the products and services, Pace has been contributing towards all the major telecommunication facets across India and abroad. **PACE Products & Services Evolution**
