

Transmission Lines

Transmission Lines are the power lines that carry the electricity to and through the interconnected power grid to consumers.

Pacepower is among the top leading Companies that executes Turnkey as well as Task/scope oriented Projects for Transmission and sub-Transmission Lines in India and other countries.

We have an array of experienced professionals at every levels of the process considering the quality and the increase in the demand from many clients specifically in India and across the globe in general.

Our scope of work broadly includes Design & Detailing of Towers, Testing, Galvanization of Towers, Foundations/Civil Works, Erection, Stringing, Survey, Route Optimization and Commissioning of Transmission Line & connecting the same with "Grid".
