

Environmental - Water

Everyone says we are doing it for nature, it is the wavelength of efforts taken that matters... We know the importance of water, we believe in a concept of "Given by nature, giving back to nature." PACE's perceptions and objectives towards nature is imbibed in each and every member of the clan, so as to achieve the same with said deadlines and pride. We intent to and penetrate into the process of "Environmental Flows" to maintain and improve the natural flow pattern of the flow in a best way considering collaborative benefits to all the sole eco-system and humans together. We are into construction of water treatment plants
laying of water carrying pipelines cross country
water distribution systems through underground and overground reservoirs
Water recycling systems, state departments as well as in residential townships and other private sector.
